

Dane County Pennito Creek PMR Public Open House

Meeting date/time: Tuesday, August 29, 2023, 4:00-7:00pm

In-person at McFarland Municipal Center | Training Room | 5915 Milwaukee St

Meeting Outreach

Invitations were sent out July 28th via USPS mail or email to community CEOs, zoning administrators, emergency management coordinators, engineers, and GIS professionals within the project footprint. The invitations included details on the in-person location as well as an Open House Press Release and Flyer. Local officials were asked to share this information with their constituents. A staff attendance list for the Open House is included below.

Meeting Information

All WDNR staff listed below were present at various times throughout the timeframe of the open house. Several members of the public from the City of Monona and Village of McFarland stopped in to see if their residence was affected by the revision. WDNR staff used ArcGIS Pro software on laptops to locate individual addresses and then view what FIRM panel they were located on. The current effective and preliminary floodplains were viewed digitally or on the printed FIRM panels to determine if these citizens would experience any changes. None of the residents ended up being affected by the revision and some were outside of the project footprint entirely.

Staff Attendance

Community	First Name	Last Name	Title	Email
WDNR	Ben	Sanborn	Floodplain Mapping Project Lead	ben.sanborn@wisconsin.gov
WDNR	Chad	Heimerl	Floodplain Engineer	Chad.Heimerl@wisconsin.gov
