

NR 151 Technical Advisory Committee

Thursday, May 28, 2020

9am – 12pm

Meeting Registration: Register in advance for this meeting - [Click here](#). After registering, you will receive a confirmation email containing information about joining the meeting.

Goals of Meeting:

- Understand the practical challenges and opportunities for reducing nitrogen use.
- Understand Minnesota's approach to reducing groundwater nitrate pollution in sensitive areas of the state.
- Understand a Wisconsin project to identify and map areas susceptible to groundwater contamination and review as a method for identifying sensitive areas in the rule.

9:00 am Welcome and Introduction
 -- *Chris Clayton, WI DNR*

9:10 am Panel Discussions: Challenges and Opportunities for Reducing Nitrogen Loss to Groundwater

 1) Farmer TAC Members

 -- *Larry Alsum / Donald Maum, Katy Schultz, David Rebout*

 2) Agriculture Researcher TAC Members

 -- *Jed Colquhoun and Carrie Laboski, UW-Madison*

10:20 am **BREAK**
