“Silver Sack”
Sale Area: 54 Acres
Tract # 8001-01-22

Location: Township of Tripp / Bayfield County, Wisconsin

Comp-Stand	Town	Range	Section	Description
139-02	48N	8W	25	S1/2NW, NWSW
139-31	48N	8W	25	S1/2NW, W1/2SW
139-35	48N	8W	35,36	Sec. 35 SWSW Sec.36 NWNW

SPECIES	VOLUME
Oak Pulp	380 CDS
Aspen	346 CDS
MX Hardwood	105 CDS
Red Pine	52 CDS
Jack Pine	40 CDS
Oak Logs	14 MBF

Minimum Acceptable Bid: \$12,302.20

- Red pine conversion rate will be 2.250 tons per cord.
- Jack Pine conversion rate will be 2.125 tons per cord.
- Aspen conversion rate will be 2.250 tons per cord.
- Mixed hardwood conversion rate will be 2.400 tons per cord
- Oak conversion rate will be 2.750 tons per cord.

***Red Pine total contains approximately 14 mbf.**

***Mixed hardwood contains approximately 88 cords of red maple and 17 cords of white birch.**

C139-S02: 16 acres

C139-S31: 29 acres

C139-S35: 9 acres

Harvest Requirements

***Cutting prescriptions for each stand are listed on their corresponding sale map.**

Design Features and Mitigation Measures

The following requirements apply to all stands:

- Do not harvest trees or operate equipment across Orange or Red paint line. Exception: Orange stand lines within the sale boundary.
- Oak wilt restrictions apply to this sale. No harvest operations from April 1 – July 15.
- Use of heavy equipment during excessively wet weather will be limited. This will be controlled during project administration. Season of operation would be year-round on this site.
- Do not pile slash within or move slash into kegs and/or RMZs, if present.
- Buffer wetlands or woodland ponds 50 feet for clear cut treatments, and no equipment within 15 feet of normal highwater mark, unless frozen ground conditions exist.
- Discourage the spread of non-native invasive species, especially spotted knapweed and the common buckthorn through proper cleaning of logging equipment before entering and leaving the sale area.
- Reserve all snags unless they pose a safety concern. A maximum of 10 snags per acre is desired.
- All pine products cut between May 1 and September 1 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed prior to May 1 of each year.
- The harvesting of any portion of a tree that lies outside the physical ownership of the Forest Service will not be allowed. Trees lying across the property line must be bucked at the ownership line and all portions of the tree that reside on the private side of the line must be left in place. Conversely, the remaining portion of the tree that lies within the physical ownership of the Forest Service may be harvested and utilized.
- All temporary roads must be bermed closed at sale completion before leaving the site. Berms can be created with dirt or by placing large debris across the road such as boulders or stumps.
- Chequamegon-Nicolet Forest Plan requires that all native surfaced approaches to paved or graveled roads have 100 ft. of gravel, 6 in. deep and 12 ft. wide put down when used during non-frozen conditions.
- All landings and skid trails will be blocked to vehicular access and possibly re-seeded at the conclusion of use if needed.
- Purchaser required to post signs on USFS roads alerting recreationalists of thinning activities.
- All road maintenance and rehabilitation post-harvest is the purchaser's responsibility. A sample contract including road maintenance specifications can be obtained by request.
- The location and clearing widths of all Temporary Roads shall be agreed to in writing before construction is started. "Temporary Roads" are roads other than Specified Roads that are constructed by Purchaser for the purpose of harvesting included timber.
- Temporary Roads shall have the road base constructed to a width of 12 feet or narrower, and with vegetative clearing of trees and brush not to exceed a width of 25 feet. Exceptions to the 12-foot maximum width of the road base may be granted by the sale administrator. Exceptions would typically be granted for sections of temporary roads where tight turns, curves, and terrain create a need so that trucks and equipment can be operated safely.
- All Temporary Roads and other Roads noted in Prescription for use in Sale will be closed from working when sale is completed. Due to excessive ATV use and "sand country" the Washburn District utilizes logging slash/stumps/debris for 100 feet beyond the berm. GNA sales will need to be consistent with current Washburn District Forest Service practice.
- Road maintenance and restrictions details are listed in the timber sale contract. Please contact a forester listed on the sale map for more information.

Additional Requirements

- Sale will be billed using mill ticket system.
- No bid bond required, a performance bond of 15% of the total sale bid value will be required.
- 3-year contract period. **Contract ending date of January 1, 2025.**
- **NO SALE MAY BEGIN WITHOUT PRIOR NOTIFICATION AND AN ON-SITE MEETING WITH A WISCONSIN DNR SALE ADMINISTRATOR.**
