BIDDING REQUIREMENTS

- 1. Bidding Procedure for Timber Sales
 - a. Bids will be made by species for each tract.
 - b. Estimated volumes and utilization specifications are listed on individual sale prospectus maps. Bid according to volumes listed on individual sale prospectus and/or maps.
 - c. The high bidder will be determined by the greatest total bid for each tract.
 - d. Bids will be opened in random order.
 - e. Bidders in attendance (virtual) can remove their bid from consideration before each individual tract is opened. Bidders must identify themselves by clearly stating their name, address, and telephone number PRIOR to a bid being opened to withdraw their bid from consideration.
- 2. Bids may be made on one or more tracts.
- 3. <u>Submit each bid in an individual sealed envelope marked "Bid for Timber Stumpage" with the timber sale name, and tract number on the outside.</u> Wisconsin DNR Timber Sale Bid Forms must be used to make bids on DNR timber sales and is included with the individual sale prospectus
- 4. A per unit bid must be made on every item on a tract. No "zero" bids for any species or products will be accepted.
- 5. Winning bidders will be notified within 24 hours of bid opening and must sign the timber sale contract and submit an acceptable performance bond within 6 weeks of the bid opening. If the winning bidder fails to execute the contract and submit an acceptable performance bond, the bidder shall be required to forfeit to the department an amount equal to 10% of the total bid amount. Failure to forfeit the 10% penalty will result in the bidder being considered ineligible to bid on any state or GNA timber sales for a two-year period.
- 6. A <u>Performance Bond or Letter of Credit</u> is required before awarding of contract. The bond shall be fifteen percent (15%) of the total bid value or a minimum of \$1000.00, whichever is greater. The bond will be held intact by the Department of Natural Resources until the satisfactory completion of the timber sale contract. Performance bonds in a form of other than cash for these sales must expire no earlier than 1-year past contract expiration date.
- 7. The Department of Natural Resources reserves the right to reject any and all bids.

SALES TAX CERTIFICATION

1. A <u>Sales and Use Tax Exemption Certificate</u> must be provided at the signing of the contract. This certificate is required to cover a contractor or individual reselling stumpage harvested for firewood/fuelwood and mills and manufacturing facilities. More information about the certificate can be found at https://www.revenue.wi.gov/DORForms/s-211-inst.pdf

UTILIZATION

- 1. All trees designated for cutting will be utilized to a 4" top diameter unless stated otherwise in the prospectus.
- 2. When designated for cutting, all trees containing one (1) or more one hundred inch (100") long stick to a four inch (4") minimum top diameter will be considered merchantable.

SCALING AND PAYMENT

- 1. If eligible for deferred payment option, payment for timber removed from site must be made within 30 days after invoice.
- 2. If not eligible for deferred payment option, no wood will be hauled from the sale area until advanced payment is made.

- 3. If sold as a lump sum sale, payment in full must be made on entire sale, or by the cutting block, or by some other means as mutually agreed upon by Department of Natural Resources and contractor.
- 4. The mill scale ticket system will be used as the preferred method of sale administration. Other scaling systems may be used at the discretion of the Department of Natural Resources.
- 5. If a woods scale system is used, all cordwood or logs will be piled for scaling. Piles will be level and square with at least 10 cords per pile or 5 MBF. At least 10 cords or 5 MBF will be piled before a scale is requested. Scaling requests must be made at least one day in advance.
- 6. No refunds of stumpage payments will be made for un-removed wood, and wood left on the sale area at contract expiration shall revert to the seller.
- 7. Scribner Decimal C Log Rule shall be used for scaling logs. Conversion from MBF to cords or cords to MBF shall be 2.44 cords per MBF for softwoods and 2.2 cords per MBF for hardwoods.
- 8. Weight scale conversions will be at rates as specified in the Department of Natural Resources timber sale handbook listed below, unless the individual timber sale has specific mixed species prorates/conversions.

CORDWOOD WEIGHT CONVERSION FACTORS POUNDS PER CORD

Species	Weight (lbs.)	Weight (tons)	Species	<u>Weight</u> (lbs.)	Weight (tons)

Elm	5000	2.5	White oak	5850	2.925
Hard maple	5100	2.55	White pine	4200	2.1
Hemlock	4800	2.4	Yellow birch	5350	2.675
Hickory	5400	2.7			

CONTRACT PERIOD

- 1. The Dead Buck Sale (tract #1-21), Soules Creek North Sale (Tract # 3-21), Soules Creek East Sale (Tract # 1-22), Re-digitized Sale (Tract #101-21), Eagle Ave Sale (Tract # 102-20), and Princeton School Forest-Eagle Rd Sale will each expire <u>June 30th</u>, 2026.
- 2. The Hatchery Pine Sale (tract #2-21) will expire Dec 31, 2025.

CONTRACT EXTENSIONS

Contract extensions will not be granted without justifiable reason. Justification will be determined by the Department of Natural Resources. Contract expiration dates are given on the individual timber sale. Contract extensions are not guaranteed. All extensions, if granted, will be for 1 year. Extension requests will be considered with the following conditions:

One and Two-year contracts

- 1st extension 5% increase in stumpage rate
- 2nd extension an additional 10% increase in stumpage rate

Three and Four-year Contracts

• 1st extension – 15% increase in stumpage rate (only 1 extension granted)

OTHER CONDITIONS

1. Wisconsin's Best Management Practices for Water Quality, Woody Biomass Harvesting Guidelines, and Best Management Practices for Invasive Species must be followed on all DNR timber sales. More information on these management guidelines can be found at the links found below.

Water Quality BMPs: https://dnr.wi.gov/topic/ForestManagement/bmp.html
Biomass: https://councilonforestry.wi.gov/Pages/WoodyBiomass/Default.aspx
Invasive BMPs: https://councilonforestry.wi.gov/Pages/InvasiveSpecies/Forestry.aspx

2. HRD/Oak Wilt requirements:

- a. Oak Wilt Restrictions: No Cutting/Skidding in stands managed for oak will be permitted from April 1- July15 unless otherwise noted in prospectus. Restricted dates may vary based on current Oak Harvesting Guidelines.
- b. Heterobasidion root disease (Annosum root rot) Prevention Treatment: Unless otherwise stated on the individual prospectus, all sales requiring the cutting of conifers will also require the Purchaser to complete heterobasision root disease (Annosum root rot) preventative treatment from April 1-Noveember 30, or under unusually warm weather between December 1 and March 31. Treatment involves chemically treating all fresh-cut stumps or significant wounds on conifers of merchantable size by applying CELLU-TREAT (disodium octoborate tetrahydrate) or Rotstop C (P gigantea), unless stated otherwise on the individual sale prospectus. Treatment shall be made within 24 hours of cutting and a dye product shall be added to liquid solutions for inspection purposes. Unless treated immediately after cutting and before the next tree is cut, ALL stumps shall remain clear of slash for application and administration purposes.
- c. The application of chemicals will be conducted by a Certified Pesticide Applicator.

3. Restricted Zones for Equipment

- a. One sale on the White River Fishery Area in Waushara County (Soules Creek North) will require use of timber mats in two different spots to prevent damage to a culvert and snowmobile bridge.
- b. The sale on the Colburn Marsh property in Adams County has two areas where equipment and log piling will be restricted or banned. See individual sale map and prospectus for more details.
- c. Best Management Practice considerations on each property may restrict where equipment can operate. See each individual prospectus for more information.

4. Fish Hatchery

a. The Wild Rose Timber Demonstration Forest property in Waushara County is an active fish hatchery for the state. Therefore, no timber harvesting operations may impact fish hatchery operations. For more information, contact Forester Mark Diesen.

Insurance

The "Contractor" (purchaser) shall provide the Department of Natural Resources with a Certificate of Insurance counter-signed by a Wisconsin Resident Agent, indicating that Worker's Compensation Insurance coverage is provided for the duration of the contract prior to any performance under it. Contractor claiming exemption, independent status, the contractor/purchaser will be required to submit a signed, notarized affidavit that affirms their exempt status pursuant to the criteria listed in section 102.07(7)(b), of the Wisconsin Statutes.

Contract may contain other provisions. Contracts may not be assigned. A sample copy of the contract is available upon request.

NOTE: Prospectus maps for each of the timber sales are available online at https://dnr.wisconsin.gov/topic/TimberSales

TRAINING STANDARD

The Purchaser shall ensure that at least one in-woods person actively engaged in performance of this contract and responsible for the logging site complies with the Wisconsin Sustainable Forestry Initiative® (SFI®) Training Standard as adopted by the Wisconsin SFI Implementation Committee (SIC). Criteria for the standard can be found at the website https://www.fistausa.org/fista/SFI_Workshops.asp or by contacting the Forest Industry Safety & Training Alliance (FISTA). Purchaser agrees to provide documentation to Seller that the training has been attained prior to initiating sale.

FOREST CERTIFICATION: White River State Fishery Area, Colburn State Wildlife Area, and Lawrence Creek State Wildlife area are 3rd party certified. Wild Rose Timber Demonstration Forest and Princeton School Forest are not certified.

Totals	2990	Tons	25	MBF	Sale Area:	52 Acres		

- (1) Pulpwood- (46% Black Cherry, 29% Elm, 24% Soft Maple)
- (2) Logs- (83% Oak, 17% other hardwood species)

Cutting Specifications

<u>Unit 1-</u> Irregular shelterwood/ Overstory removal: (13 acres) cut all pine and hardwood trees that are spring poles or damaged and larger than 10 inches in DBH unless marked with green, pink, red, or blue paint. Avoid damage to hardwood saplings and poles. If damage occurs to these saplings and poles during operations, they must be severed. Heterobasidion Root disease (HRD) preventative treatment required on all conifer stumps. Treatment not required December 1st-March 31st.

<u>Unit 2-</u> White Pine seed Tree/ overstory removal: (39 Acres) Cut all trees 4 inches DBH and larger unless marked with green, red, pink or blue paint. Avoid damage to regeneration as much as possible. Heterobasidion Root disease (HRD) preventative treatment required on all conifer stumps. Treatment not required December 1st-March 31st.

- See cover letter for additional requirements.
- Sale is located in two areas. West of Cottenville Ave. and East off of County Rd Y. All harvest areas
 are easily accessible from county or town roads and can be accessed via DNR parking areas/ access.
 Private land access will likely be needed to provide landing space off of County Rd Y.
- Harvesting only allowed from July 16th March 31st for the entire sale.

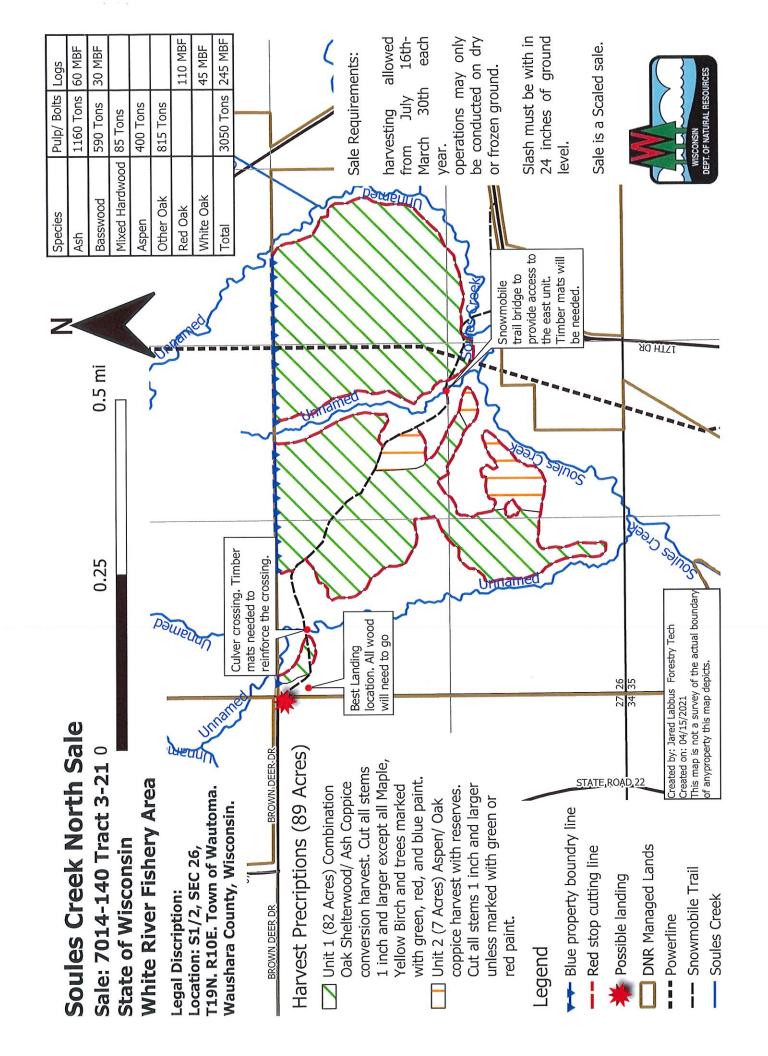

- The entire sale area is high and dry ground. However, part of the sale is adjacent to the White River.
- Slash height shall be no hire then 24" from ground level. Slash shall be kept within the sale area. No trees shall be felled within the wetland areas and/or the White River.
- Landings must be approved by DNR forester.
- All applicable BMPs for water quality shall be followed.
- Heterobasidion Root disease (HRD) preventative treatment required on all conifer stumps. Treatment not required December 1st-March 31st.
- Extra care is to be taken to prevent damage to existing regeneration. If more than 25% of regeneration is damaged it will be considered excessive damage
- Utilization down to a 4" diameter top for hardwoods and conifers.
- All equipment shall be free of debris prior to moving on site and prior to leaving to prevent the spread of invasive plants.

Totals	1985	Tons	30	MBF		

(1) Mx Hwd - 68% soft maple, 22% white birch, 10% ash

Cutting Specifications

<u>Unit 1-</u> <u>Oak Regeneration and Maple/Aspen/Spruce/Ash clearcut</u>. 51 Acres. Cut all stems greater than 1", except trees marked with green paint. Leave red and blue boundary trees. Units are labeled on the map where harvesting is not allowed from April 1st to July 15th to prevent the spread or introduction of oak wilt.

Unit 2- *Red pine/White pine/Spruce thinning*. 10 Acres, Cut all trees or rows marked with orange paint. HRD treatment required from April 1st to November 30th.

- All landings and skid trails must be pre-approved by DNR forester and Property Manager.
- Lower areas exist within the timber sale area; therefore operations must occur on dry or frozen ground. 3 units are restricted to cutting from July 16th through March 31st.
- HRD treatment required: Treat all conifer stumps with Cellu-Treat or other chemical labeled for HRD within 24 hours of cutting to prevent the introduction and/or spread of the disease. No treatment required from December 1st March 31st.
- Slash must be within 24 inches of ground level.
- Utilization down to a 4" diameter top required for hardwoods and conifers.
- All dead snags that do not pose an immediate risk during the felling/skidding operation will be retained for wildlife purposes.
- Contract length is 3 years or 3 cutting cycles (expires June 30th, 2026) from the sale date.
- Part of the sale is near Soules Creek; Applicable BMP's shall be followed accordingly.
- All equipment shall be free of debris prior to moving on site and prior to leaving to prevent the spread of invasive plants.

Cutting Specifications

<u>Unit 1-</u> <u>Jack pine clearcut and Aspen Coppice Harvest</u>. 1.5 Acres. Cut all stems greater than 1", except trees marked with red paint. HRD treatment required from March 15th- December 1st.

<u>Unit 2-</u> <u>Jack Pine Salvage Harvest.</u> 2 Acres, cut all jack pine; all other species must be left. HRD treatment required from March 15th- December 1st.

<u>Unit 3-</u> <u>Red and white pine Thinning.</u> 77.5 Acres, cut all trees marked with orange paint. All other trees with blue or red paint shall be left. HRD treatment required from March 15th-December 1st.

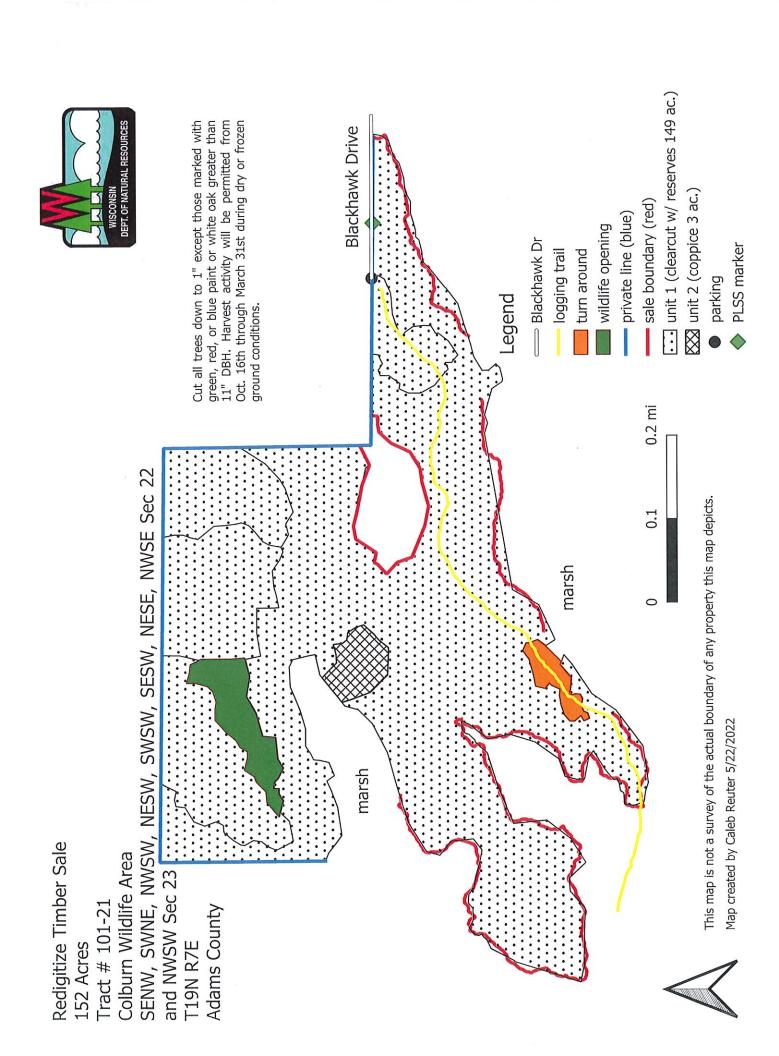

- All landings and skid trails must be pre-approved by DNR forester and Property Manager.
- Timber sale operations must not impact hatchery operations.
- HRD treatment: Treat all conifer stumps with Cellu- Treat or other chemical labeled for HRD within 24 hours of cutting to prevent the introduction and/or spread of the disease. No treatment required from December 1- March 15.
- Slash must be within 24 inches of ground level.
- Utilization down to a 4" diameter top for hardwoods and conifers.
- All dead snags that do not pose an immediate risk during the felling/skidding operation will be retained for wildlife purposes.
- Contract length is 3 years or 3 cutting cycles (expires December 31st, 2025) from the sale date.
- The entire sale area is high and dry ground. However, part of the sale is adjacent to the headwaters to the pine river and to the Wild Rose Fish Hatchery. Applicable BMP's shall be followed accordingly.
- All equipment shall be free of debris prior to moving on site and prior to leaving to prevent the spread of invasive plants.

Mixed Fuelwood	1,100 Tons				
Totals	6,450 Tons	110	MBF		

- Black oak pulp/bolts will include 95% black oak and 5% white oak
- Mixed hardwood pulp/bolts will include 74% red maple, 12% black cherry, 9% white birch, and 5% American elm.
- Black Oak Sawtimber will include 94% Black Oak, 5% Red Maple, and 1% American Elm
- Mixed fuelwood is primarily dead black oak

Cutting Specifications

<u>Unit 1-</u> This 149 acre unit consists of oak and mixed hardwoods and will involve a clearcut with reserve trees. All trees greater than 1" will be cut except for those marked with green, red, or blue paint and all white oak greater than 11" DBH.

<u>Unit 2-</u> This 3 acre unit consists of an aspen stand and will involve a coppice harvest. All trees greater than 1" will be cut except those marked with red paint.

- Harvest activity will be permitted between October 16th and March 31st during dry or frozen ground conditions.
- Harvest all merchantable trees down to a 4" top within the sale area except white oak greater than 11" DBH and other green, red, or blue marked trees.
- All trees containing one or more reasonably sound 100-inch sticks or 8 foot 6 inch logs, meeting to the minimum top diameter are considered merchantable.
- The contractor must contact the appropriate Department of Natural Resource office a minimum of two working days prior to starting a sale contract.
- The location and building of any new roads, landings, and skid trails must be approved by the DNR forester.
- Access to the sale is off Blackhawk Drive; a logging trail runs through the southern portion
 of the sale and connects to a parking area at the end of Blackhawk Dr.
- There is a two-acre opening on the logging trail that may be used as a turnaround during frozen ground conditions only. No wood may be piled in the opening.
- There is a five-acre wildlife opening in the northern part of the sale. No equipment may be operated in this opening.
- A strip of wetland runs through the sale separating north and south and will need temporary slash mats for equipment crossing.
- Longer skids will be required from North to South unless the purchaser gains private land access to the North of the sale area.
- All slash must be lopped and scattered within 2 feet of the ground and pulled back into the sale area at least 10 feet from property lines and roads. No slash may be piled in wetland areas.
- Maximum stump height shall not exceed stump diameter; except for all stumps less than 10 inches in diameter, the stump height may not exceed 10 inches.
- All harvest activity will be suspended for the opening weekend of the annual deer firearm season to ensure the safety of loggers and hunters.
- All equipment shall be washed prior of moving on site to prevent the spread of invasive species.

ESTIMATED VOLUME:

Species Tons (see cover letter for weight conversions)

Spruce 54 Tons

Mixed Hardwoods 26 Tons (Oak, maple, birch)

Aspen 10 Tons
White Pine (mixed products) 525 Tons
Red Pine (mixed products) 1,154 Tons
TOTAL 1769 Tons

ACCESS:

Sale access is W1298 Eagle Rd (north and west of Princeton).

DESCRIPTION OF STUMPAGE:

This 64-acre timber sale consists of red and white pine thinning (58 acres), several small areas of oak clear-cut/shelterwood regeneration (6 acres). Topography is level.

HARVESTING PERIOD:

- Harvest and hauling dates are November 16-March 4, except for gun deer season. No harvesting or hauling will take place during the 9-day deer hunt.
- Contract length is 3 years or 3 cutting cycles from the sale date June 30th, 2026.

HARVESTING/SALE REQUIREMENTS:

- Cut all trees marked with orange paint (pine thinning), cut all trees inside red paint line (oak regeneration).
- See cover letter for additional requirements.
- All dead snags that do not pose an immediate risk during the felling/skidding operation will be retained for wildlife purposes.
- All slash shall be contained within the sale area. No trees shall be felled, and no slash shall be left in the adjacent wetlands. Slash shall be removed from trails.
- Timber mats will be used for equipment to cross pipeline (indicated on map).
- Access road and trails will be maintained to presale conditions.
- NHI Concerns: Landings must be pre-approved by DNR Forester to avoid take of a potential NHI elements.
- Heterobasidion root disease (HRD) preventative treatment required in the red pine unit. Treatment not required if harvesting December 1st March 31st.
- All pine products cut between April 1 and September 1 each year must be removed from the sale area within three
 weeks from time of cutting. Pine products cut during the remainder of the year must be removed prior to April 1
 of each year.
- Any and all bids may be rejected.
