BRSF Tract 12-22

G.I. Pine Sale

T21N-R3W Sec 30

Sale size: 14 Acres

Contract Period: 3 Years

Estimated Volume

<u>Species</u>	<u>MBF Included</u>	<u>Tons</u>
Red Pine*	30	460
Jack Pine	0	130
Aspen**	0	110

*Includes approx. 1 MBF and 3 tons of white pine

** Includes approx. 3 tons of red maple

Scaled Sale

Minimum Bid Value = \$ 3,420.00

Special Operating Requirements and Slash Disposal:

- 1. Cut all orange-marked trees, and all jack pine, red maple, and aspen over 2" in diameter. Do not harvest any oak.**
- 2. Access to this sale is through private land. Access agreement for timber harvesting has been secured by DNR. The Landowner is Gordon Iverson at W9816 Hwy 12. Contact the forester for details.**
- 3. Approximately 9 acres of this sale will require frozen or very dry conditions. See map for more details.**
- 4. All areas of the sale will require stump treatment for Heterobasidion Root Disease (HRD) unless harvested between December 1 and March 31. Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either CELLU-TREAT (disodium octaborate tetrahydrate) or Rotstop C (biological fungicide). Treatment shall be made as soon as possible and no later than one day after harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions; but should be considered when submitting bids on these timber sales.**
- 5. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.**
- 6. The sale boundaries are blue paint lines, railroad tracks and the marsh on the edge of the pond. Do not fell trees across paint lines and do not cut painted boundary trees.**
- 7. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.**
- 8. Glossy buckthorn is present within the sale area. Equipment must be cleaned prior to moving off site.**

General Requirements:

- 1. All designated tree species must be cut and forwarded concurrently with the sale.**
- 2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.**
- 3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.**
- 4. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.**
- 5. Notify DNR forester (Ian Remus 715-928-2462) before you start the job, and each time you pull out or return to the job.**
- 6. Any new roads and all landings must be approved by a DNR forester before operations begin.**
- 7. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.**
- 8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.**
- 9. Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**
