-  Woods Roads

 Stand 3 (69 acres) - is a 1978 origin aspen stand. The aspen will be regenerated via a coppice cut with standards, except within the Scenic Management Area where it will be thinned to encourage longer lived species. Red/white pine, oak, and spruce will generally be retained throughout all areas. Planting or seeding of white pine may occur post harvest within the Scenic Area and some site preparation work may be needed prior to then.

 Stand 15 (38 acres) - is a 1965 origin red pine plantation. This stand will be thinned to improve overall stand quality, health and vigor.
